Thought for the Week

Physicists & astronomers see their own implications in a world being round, but to me it means that only one third are asleep at any given time & the other two thirds are up to something.

Dean Rusk.

Questions Hard to Answer

Once you're in Heaven, do you get stuck wearing the clothes you were buried in for eternity?

Why does a round Pizza come in a square box?

If a deaf person has to go to court is it still called a hearing?

What disease did cured ham actually have?

How is it we put a man on the moon before we figured out it would be a good idea to put wheels on luggage?

Why do you have to "put your two cents in" but it's only a "penny for your thoughts"? Where's that extra penny going to?

Why is it that people say they "slept like a baby" when a babies wake up like every two hours?
