Finding Work

My first job was working in an orange juice factory, but I got canned ... couldn't concentrate. Next I tried working in a muffler factory but that was too exhausting. I managed to get a good job working for a pool maintenance company, but the work was just too draining. Next was a job in a shoe factory; I tried but I just didn't fit in. After many years of trying to find steady work I finally got a job as a historian until I realized there was no future in it.
